| Fed Funds Rate (USA) | 1,00% |
| BoE Rate (UK)        | 1,00% |

#### MARKET REPORT

| S&P upgrades South Africa's outlook to 'positive'                                                                                                                                                                                                                                   |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| S&P Global has upgraded its outlook of South Africa to "positive" from "stable". This was thanks in large part to strong commodity prices which are boosting the country's tax income and exports. Its credit rating of the South African government still remains "junk", however. |

**HEADLINE CPI:** The CPI calculates the cost to purchase a fixed basket of goods as a way of determining how much inflation is occurring in the broad economy. The CPI uses a base year and indexes current year prices based on the base year's values.

**CORE CPI:** The headline figure is not adjusted for seasonality or for the often volatile elements of food and energy prices, which are removed in the Core CPI.
