MARKET REPORT

S&P says positive outlook on South Africa still faces hurdles

While South Africa dodged ratings downgrades so far this year, it is not certain that an upgrade will soon follow. S&P previously revised South Africa's outlook from stable to positive - this is a one-third chance of an upgrade within the next year. An S&P official says that the ratings agency will be monitoring the impact of load shedding and infrastructure bottlenecks on South Africa's economic outlook.

HEADLINE CPI: **The CPI calculates the cost to purchase a fixed basket of goods as a way of determining how much inflation is occurring in the broad economy. The CPI uses a base year and indexes current year prices based on the base year's values.**

CORE CPI: **The headline figure is not adjusted for seasonality or for the often volatile elements of food and energy prices, which are removed in the Core CPI.**
