MARKET REPORT

Year of the bond starts with a \$150bn spree	
After optimism swelled for weeks that 2023 would finally bring relief for the world's battered bond buyers, borrowers took advantage by issuing more than \$150 billion (R2.56 trillion) of new debt in just four days. HEADLINE CPI: The CPI calculates the cost to purchase a fixed basket of goods as a way of determining how much inflation is occurring in the broad economy. The CPI uses a base year and indexes current year prices based on the base year's values.

CORE CPI: The headline figure is not adjusted for seasonality or for the often volatile elements of food and energy prices, which are removed in the Core CPI.
