Name	% Move Y/Y
Core CPI	3,6%
Headline CPI	2,8%

MARKET REPORT

2025 has been kind to the JSE – but not to most shares

Investors did quite well on the Johannesburg Stock Exchange (JSE) in the first six months of 2025, with the JSE All Share Index increasing by 14.7% since the beginning of the year. The JSE returned nearly 22% over the last year, excluding dividends. It is interesting that the good performance since the first trading day of 2025 can be attributed to only a handful of shares. Only 25% of the 289 listed shares achieved double-digit returns and only 59 shares posted gains of more than 14% in the first half.

HEADLINE CPI: The CPI calculates the cost to purchase a fixed basket of goods as a way of determining how much inflation is occurring in the broad economy. The CPI uses a base year and indexes current year prices based on the base year's values.

CORE CPI: The headline figure is not adjusted for seasonality or for the often volatile elements of food and energy prices, which are removed in the Core CPI.
