MARKET REPORT

BP profits more than double, beating expectations as Iran war boosts oil prices

BP on Tuesday reported stronger-than-expected first-quarter earnings, citing "exceptional" oil trading contributions. The results come as energy supermajors experience a significant share price boost, with fossil fuel prices soaring amid the Iran war. BP said it expects reported upstream production to be lower in the second quarter when compared to the first three months of the year.

HEADLINE CPI: The CPI calculates the cost to purchase a fixed basket of goods as a way of determining how much inflation is occurring in the broad economy. The CPI uses a base year and indexes current year prices based on the base year's values.

CORE CPI: The headline figure is not adjusted for seasonality or for the often volatile elements of food and energy prices, which are removed in the Core CPI.
