HEADLINE CPI: The CPI calculates the cost to purchase a fixed basket of goods as a way of determining how much inflation is occurring in the broad economy. The CPI uses a base year and indexes current year prices based on the base year's values.

CORE CPI: The headline figure is not adjusted for seasonality or for the often volatile elements of food and energy prices, which are removed in the Core CPI.

MARKET REPORT

Oil steadies after clashes around Hormuz strain fragile truce

Oil steadied after Monday's jump, as traders tracked the increasingly fragile four-week ceasefire in the Middle East following fresh clashes between the US and Iran.

Brent edged below \$114 a barrel, after surging 5.8% on Monday. Hundreds of vessels were seen clustering near Dubai on Tuesday, as more ships moved away from a still-empty Strait of Hormuz in response to Iran's efforts to widen its area of control. In the United Arab Emirates, an oil terminal in Fujairah was hit.
