Core CPI	3.9%
Headline CPI	4.0%

MARKET REPORT
S&P 500 extends winning streak despite Iran war

The cost of protecting against an ordinary selloff fell to its lowest since early 2025 by one measure, while the cost of insuring against a sudden crash dropped to its lowest this year. Demand for bullish calls, by contrast, has proved relentless across semiconductor stocks, underscoring how concentrated the market's optimism remains in a narrow group of AI winners. "AI is the hottest game in town and potentially a bubble in the making," said Global Gate's Lang. "But we're in the early stages and there's still money to be made."

[READ MORE](#)

HEADLINE CPI: The CPI calculates the cost to purchase a fixed basket of goods as a way of determining how much inflation is occurring in the broad economy. The CPI uses a base year and indexes current year prices based on the base year's values.

CORE CPI: The headline figure is not adjusted for seasonality or for the often volatile elements of food and energy prices, which are removed in the Core CPI.
