MARKET REPORT
South Africa secures first Fitch rating upgrade since 2005

South Africa received its first credit-rating upgrade from Fitch Ratings in almost 21 years on Friday, with the agency raising the country's long-term foreign and local currency ratings by one notch to BB- from BB-, while maintaining a stable outlook.

The upgrade places SA alongside only one other G20 country to receive a ratings upgrade from Fitch this year and marks a significant turnaround after years of downgrades by major ratings agencies.

HEADLINE CPI: The CPI calculates the cost to purchase a fixed basket of goods as a way of determining how much inflation is occurring in the broad economy. The CPI uses a base year and indexes current year prices based on the base year's values.

CORE CPI: The headline figure is not adjusted for seasonality or for the often volatile elements of food and energy prices, which are removed in the Core CPI.
