Core CPI	4.0%
Headline CPI	4.5%

MARKET REPORT
What the two-pot system has taught us about financial behaviour in SA

On one hand, preservation has improved by a significant 33% since the inception of the two-pot system. This means that more retirement fund members are leaving their retirement money invested when they change jobs instead of cashing it out, and it suggests that the two-pot system's responsible flexibility can still improve retirement outcomes over time. But many of those who could, dived in right away – and they did so across all income levels, fund values, and ages. The first 21 months of two-pot have shown that education and communication are critical. Simple, timely, and personalised messages can improve preservation rates.

HEADLINE CPI: The CPI calculates the cost to purchase a fixed basket of goods as a way of determining how much inflation is occurring in the broad economy. The CPI uses a base year and indexes current year prices based on the base year's values.

CORE CPI: The headline figure is not adjusted for seasonality or for the often volatile elements of food and energy prices, which are removed in the Core CPI.
